I am a resident of your district and I believe that there has been no greater invention than the free and open Internet. Unfortunately, on December 14, 2017 the FCC voted to remove protection for the free and open Internet against the wishes of over 80% of the American population. This was an overt slight to the people of this great nation. I respectfully urge you to use the Congressional Review Act to overturn this travesty and introduce and/or support legislation to protect the free and open Internet moving forward.

Thank you and have a wonderful day.
